EXPERIENCE

Freelancer

April 2018 - PRESENT

I've given myself several tasks for the last two years and all of them have been successfully completed. A reddit clone, a whatsapp like app with disappearing messages and AES encryption, a fully functional GraphQL API in both SQL/NoSQL versions to mention a few.

I am always eager to be involved in new things, contribute to team work and always to expand my knowledge and skills for as much as I can. I am interested in the AI sector and I am currently in an entry level.
